**Procedure:****Determination of Adjustment Factor (R-Factor)**

R-factor	S3/S2

**Options****1. Adjustment of Strike Prices and Contract Sizes**

All existing strike prices will be multiplied by the R-factor.

The contract size will be divided by the R-factor.

The version number of the existing series will be increased by 1.

All existing orders and quotes will be deleted after close of trading on the last cum trading day.

## **2. Exercises**

In general, upon exercise of an adjusted series, cash settlement will be made for the fractional part of the new contract size.

For adjusted series as of version 2, deviations in the delivery process might occur. In report RPTTA111 (All Active / Inactive Series), those parts of the contract size are displayed for which cash settlement takes place upon exercise of an adjusted series.

## **Futures**

### **1. Adjustment of Contract Size and Variation Margin**

The adjustment will be made by means of the same R-factor as for the options.

To adjust the calculation of the Variation Margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-factor.

The new contract size will be calculated as follows:

$$\text{Contract size new} = \text{contract size old} / \text{R-factor}$$

All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.

The adjustment will also be made for existing positions in OTC Flexible Futures.

### **2. Introduction of a new Contract**

A new contract on Elisa Corporation shares will be introduced with standard contract size 100 and new product code EIAH.

The exact date of introduction will be published via the **Market Supervision Messages** window.

As soon as the new contract is available for trading and there are no more series with open interest in the original contract on Elisa Corporation shares (EIAG), trading in this contract will be put on "HALT" and finally discontinued.

**If there is no open interest in the original contract on Elisa Corporation (EIAG) after close of trading on the last cum trading day, no adjustment will take place and no new contract will be introduced.**
