Volatility Futures:

1. Introduction of Additional Maturities

2. Extension of Designated Market Maker Scheme

1. Introduction of Additional Maturities

Eurex will increase the number of maturities for VSTOXX[®] Mini-Futures contracts from currently four to seven. The current scheme with four maturities, which consists of three consecutive monthly maturities and one quarterly maturity from the February cycle (February, May, August, November) will be replaced by a new scheme with seven consecutive monthly maturities. Thus, the new maturity pattern includes the maturities of the old one.

2. Extension of Designated Market Maker Scheme

Eurex will replace the existing Designated Market Maker Scheme by a new scheme.

As Designated Market Makers, Eurex Members agree to supply continuous bid and ask prices (quotes) for a determined minimum number of contracts in compliance with maximum spreads. Also, amongst other things, Designated Market Makers agree to take over further obligations with regard to efficient operation of the market by providing additional price information. If required by Eurex, they agree to supply additional price and value analysis.

In return, Designated Market Makers will be reimbursed all transaction fees for the time period from June 17, 2010 until December 31, 2011 for trades concluded on the M-accounts if they fulfil all quote obligations.

Market participants who wish to register as Designated Market Makers are requested to use the form in attachment 2.
