**Options on Money Market Derivatives: Change of Calculation Method for
Market Maker Fees and Harmonization of Volume Rebates**

The Management Boards of the Eurex Exchanges and the Executive Board of Eurex Clearing AG decided to change the calculation method for Market Maker fees with effect from **August 2, 2010** for options on Three-Month EURIBOR Futures (product code: OEU3), following the change in fee calculation that had been announced with Eurex circular 022/02.

The new fee calculation method will be in line with the method applied for options on Euro fixed income futures and will take into account the high level of OTC block trade business performed in this segment and the high take-up volume in the A- or P-accounts for Market Makers.

The fee model will be adjusted by extending Market Maker fee refunds to cover the net position account transfers towards M-accounts, up to a maximum of the overall take-up volume in product OEU3. For EURIBOR options, the reduced fees apply for all contracts traded on the M-account, as well as for net positions transferred onto the M-account, up to a maximum of the overall take-up volume.

Moreover, it was decided to harmonize volume rebates for options on Three-Month EURIBOR Futures with the volume rebates granted for options on Euro fixed income futures.

As of August 2, 2010, the updated Price List for Eurex Clearing AG will be available for download on the Eurex Clearing website under the path:
