The updated Contract Specifications will be available on the Eurex website as of the ex date under the path:

**[www.eurexchange.com](http://www.eurexchange.com) > Documents > Rules and Regulations**

**ISIN:**

The ISIN of the MAPFRE share (ES0124244E34) will remain unchanged.

**Procedure**

**Determination of Adjustment Factor (R-Factor)**

The official closing auction price of the MAPFRE share at the Bolsa de Madrid on November 16, 2009 will be the basis for determination of the R-factor.

The R-factor will be determined with eight decimal places. It is calculated in the following way:

$$R = ((\text{number of existing shares} / \text{number of new shares}) * (1 - ((\text{issue price of new shares} + \text{dividend disadvantage}) / \text{closing auction price}))) + ((\text{issue price of new shares} + \text{dividend disadvantage}) / \text{closing auction price})$$

$$R = ((45 / 46) * (1 - ((2.583 + 0.07) / \text{closing auction price}))) + ((2.583 + 0.07) / \text{closing auction price})$$

## **Futures**

### **1. Adjustment of Contract Size and Variation Margin**

To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-factor.

The new contract size will be calculated as follows:

$$\text{Contract size new} = \text{contract size old} / \text{R-factor}$$

All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.

The adjustment also refers to existing positions in OTC Flexible Futures.

### **2. Introduction of a new Contract**

A new contract on MAPFRE will be introduced with standard contract size 100 and new product code CMAI.

The exact introduction date will be published via the **Market Supervision Messages** window.

As soon as the new contract will be available for trading and there are no more series with open interest in the original contracts on MAPFRE (CMAG / CMAH), trading in these contract will be set on "HALT" and discontinued.
