Attachment:

List of Equity and Equity Index Options with information regarding RMM availability

Summary:

In their session on November 2, 2005, the Management Boards of the Eurex Exchanges approved the following decisions on Market-Making, effective **December 1, 2005**:

- Phasing out of the fee rebates for Market-Making on Request (RMM) for all liquid products, which means products in which permanent quotation is already guaranteed on a sufficiently high-quality level. A list of Eurex equity and equity index options with information in which products RMM will be phased out is attached to this circular. All current RMMs will retain their status as Market Makers, keep their M-accounts and will have continued access to all quoting functions.
- All RMMs will receive preferential treatment for closing out M-account positions in any product concerned.
- The introduction of an alternative Permanent Market-Making scheme (PMM Long/PML) for the most liquid equity index options. Compared to the currently available Permanent Market-Making obligations, this new scheme focuses on maturities between eighteen months and five years.
- With the introduction of harmonized exercise prices on November 21, 2005 (see Eurex circular 212/05) additional exercise prices will be generated in certain equity options. This is true mainly for the first three expiration months. Existing exercise prices which then become redundant will be deleted from the system, if there is no open interest.

Information on Market-Making

In their session on November 2, 2005, the Management Boards of the Eurex Exchanges approved the following decisions regarding Market-Making:

- **Phasing out of the fee rebates for RMM for liquid options on equities and equity indexes**

Eurex will phase out the fee rebates for Market-Making on Request (RMM) effective December 1, 2005 for liquid products, which means options in which currently quotation is provided in a continuous and sustainable way. These are the AMM packages for Dow Jones EURO STOXX 50[®] Index, DAX[®] Index, SMI[®] Index and the Dutch package including all constituents, as well as selected other liquid equity options.

A complete list of Eurex equity and equity index options with the respective information is attached to this circular.

- **M-account positions in products where Regular Market-Making will be phased out**

From December 1, 2005 until February 28, 2006, all previous RMMs in a given product will receive preferential treatment, if they wish to close out their M-account positions in any product concerned.

As a courtesy to our members we will grant the RMM fee rebates for the monthly reduction of the total net position in the M-account in a given product to all RMMs. The number of contracts of this reduction is determined as the difference of the net positions from month end to month end and excluding the positions of the expiring maturity.

Up to the end of this three-month period, a manual transfer of the remaining positions to other accounts can be triggered free of charge by the customer upon request.

M-accounts with their respective quoting facilities will be maintained indefinitely to both allow members to maintain a position until expiration or continue supplying quotes, if desired.

This procedure for M-account transfer can be applied for whenever a RMM program is discontinued in a product that has attracted sufficient continuous Market-Making.

- **Introduction of Permanent Market-Making Long (PMM Long/PML)**

Effective December 1, 2005, Eurex will introduce an alternative Permanent Market-Making scheme, PMM Long (PML), for options on Dow Jones EURO STOXX[®], DAX[®], and SMI[®] Index. The new scheme focuses on long-term expirations (eighteen months to five years), without imposing any obligations in shorter maturities.

The obligations set for PML are as follows:

- Coverage of 85 percent of the monthly trading period
- Minimum quote size of 100 lots
- Maximum Spread of 10 percent
- Six out of nine strikes
- Quotation of five expirations exceeding 18 months.

The PML scheme will exist in parallel with the original PMM and the recently introduced PMM Short (PMS). For every registered Permanent Market Maker, all of these three obligation schemes will be monitored.

Market Makers fulfill their overall Permanent Market-Making obligations if they fulfill at least one of these three sets of requirements.

The revised Market Maker Obligations will be available for download from the Eurex website under the path:

www.eurexchange.com > Member Section > Market Making > Market Maker Obligations

- **Harmonized exercise prices**

With the introduction of harmonized exercise prices on November 21, 2005 (see Eurex circular 212/05), additional exercise prices will be generated in certain equity options. This is true mainly for the first three expiration months. Exercise prices which then become redundant will be deleted from the system, if there is no open interest.

Frankfurt, November 18, 2005

Overview of products in which Regular Market Making (RMM) is phased-out:

- RMM is maintained in products marked “+” in the column “RMM”
- RMM is phased-out in products marked “-“ in the column “RMM”
