Adjustment of ISIN:

The ISIN of the Atrium European Real Estate Limited share (JE00B3DCF752) will remain unchanged.

Procedure:**Determination of Adjustment Factor (R-Factor)**

The closing auction price of the Atrium European Real Estate Limited share at Wiener Börse on the last cum trading day, December 8, 2009, will be the basis for determination of the R-factor:

Closing auction price of the Atrium share	S1
S1 minus interims dividend	S2
S2 minus extraordinary dividend	S3
R-factor	S3/S2

Options**1. Adjustment of Strike Prices and Contract Sizes**

All existing strike prices will be multiplied by the R-factor.

The contract size will be divided by the R-factor.

The version number of the existing series will be increased by 1.

Adjusted strike prices and contract sizes will be published via the **Market Supervision Messages** window immediately after close of trading on the last cum trading day.

New series with standard contract size 100 and version number 0 will be introduced effective ex date.

The adjustment also refers to existing positions in OTC Flexible Options.

All existing orders and quotes will be deleted after close of trading on the last cum trading day.

If there is no open interest after close of trading on the last cum trading day, no adjustment will be made.

2. Exercises

Generally, upon exercise of an adjusted series, cash payment will be made for the fractional part of the new contract size.

For adjusted series as of version 2, deviations in the delivery process might occur. In report RPTTA111 (All Active / Inactive Series), those parts of the contract size are displayed for which cash settlement takes place upon exercise of an adjusted series.

Futures

1. Adjustment of Contract Size and Variation Margin

The adjustment will be done by means of the same R-factor as for the options.

To adjust the calculation of the Variation Margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-factor.

The new contract size will be calculated as follows:

$$\text{Contract size new} = \text{contract size old} / \text{R-factor}$$

All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.

The adjustment also refers to existing positions in OTC Flexible Futures.

2. Introduction of a new Contract

A new contract on Atrium European Real Estate Limited shares will be introduced with standard contract size 100 and new product code ODDG.

The exact date of introduction will be published via the **Market Supervision Messages** window.

As soon as the new contract is available for trading and there are no more series with open interest in the original contract on Atrium European Real Estate Limited shares (ODDF), trading in this contract will be put on "HALT" and finally discontinued.

If there is no open interest for the original contract on Atrium European Real Estate Limited (ODDF) after close of trading on the last cum trading day, no adjustment will take place and no new contract will be introduced.
