Attachment:

Market Maker Obligations at Eurex, effective January 2, 2009 (only on the Eurex website)

Summary:

Effective **January 2, 2009**, quotation requirements for Market Makers in equity options at Eurex will be changed. The adjustment will affect parameters in the three different Market-Making models, i.e. Regular Market-Making (RMM), Permanent Market-Making (PMM) and Advanced Market-Making (AMM).

Minimum quote sizes and the spread class assignments are set according to market conditions and liquidity.

Members who are taking part in Market-Making are kindly requested to adjust their system settings accordingly. It is highly recommended to verify market maker performance in the first days of January 2009 using the respective Eurex MMPM reports.

Market Maker Obligations in Equity Options: Change

The minimum quote sizes for German, Swiss, French, Dutch, Scandinavian and Italian equity options are adjusted based on a scheme that captures market conditions and liquidity for each individual product. Further there will be adjustments in the spread class assignment (see list below).

The changes will become effective on January 2, 2009.

1. List of minimum quote sizes and spread class allocation

Product	Product ID	Spread Class	Minimum Quote Size (Contracts)		Number of expirations to be quoted for PMM/AMM; the first	AMM Package ID
