## Equity Derivatives

# Scandinavian Equity Options at Eurex – Let Your Performance Move up

eurex

## The Brightest Stars in the Northern Skies

We offer more than 30 different derivatives based on the major Scandinavian stocks. Such as Nokia: With daily trading volumes of up to 100,000 contracts, the Nokia option has firmly established itself among the five most actively traded Eurex equity options.

## Offering Options on Swedish Stocks for the First Time

With EUR-denominated options on Ericsson and Nordea Bank shares we can offer you derivatives on the Swedish heavyweights in the OMX-S 30 universe. We have designed the specifications of the new options contracts to ensure you benefit from maximum efficiency in trading these instruments. Their maximum expirations – five years for options on Ericsson, and two years for Nordea Bank – make them perfect hedging tools. The contract size for Ericsson options is 500 shares (as opposed to the standard size of 100 shares), taking into account the relatively low price of the underlying instrument in euro terms. All other contract details are in line with standard Eurex contract specifications.

## Single Stock Futures on Major Scandinavian Stocks

In addition to these equity options, you can trade Eurex Single Stock Futures on around 20 Nordic stocks, all of which are included in the Dow Jones

STOXX® 600 Index. Eurex is the world's largest marketplace for EUR- and CHF-denominated futures on equities.

## Derivatives on the Finnish OMXH25 Benchmark Index

We offer both futures (FFOX) and options (OFOX) on the OMX Helsinki 25 Index, a key Scandinavian index. Using these products, you can track the performance of the Finnish benchmark index, with a relatively low capital commitment.

## Roughly 200 Options and 370 Futures on Relevant European Equities

Overall, some 200 options on individual shares from eight different countries across Europe are available for trading on Eurex. Our range of equity derivatives is complemented by roughly 370 Single Stock Futures on the major European equities, and all of these instruments are traded on the same platform. Since we cover the entire value chain, ranging from trading to clearing and settlement, “one-stop shopping” at Eurex provides you with the benefit of more efficient settlement processes, along with a more efficient use of capital thanks to cross-margining opportunities.

## Numerous Benefits – Also for Off-Exchange Trading

In your capacity as a professional OTC customer, we offer you further opportunities for cost reduction and non-traditional yield enhancement. In addition to cost efficiencies and risk minimization,

thanks to the settlement of executed trades via Eurex Clearing AG, we offer you further cost saving opportunities in the form of fee caps, introduced for extra-large block trades. This means that transaction costs will never exceed a certain cap, no matter how many equity options or futures you actually trade in a block. For options on Scandinavian shares, the fee cap has been set to 2,000 contracts.

## Flexible Options Facility for Equity Options

In OTC trading, you have the opportunity to customize your equity options trades. The Eurex Flexible Options facility allows customers to set the key parameters of a contract – that is

- exercise price,
- expiration date and
- exercise style (American/European) – individually. In addition to equity options of the standard series, you may therefore also trade customized contracts on the same platform.

## High Volumes Ensure Market Liquidity

Eurex is the world's leading trading platform for European derivatives, and one of the largest markets for equity options on EUR- and CHF-denominated shares. Accordingly, daily traded volumes are high in many Eurex equity options. When trading at Eurex, you benefit from a large liquidity pool and the tightest of spreads.
