Eurex Expands Its European Equity and Equity Index Options Initiative

On January 1, 2005, Eurex expanded its European Equity and Equity Index Options Initiative, enhancing its position as the leading pan-European equity derivatives exchange. The core element of the initiative is a Continuous Market-Making model, which will leave Eurex well-positioned to attract additional order flow.

The European Equity and Equity Index Options Initiative is primarily based on the implementation of a Continuous Market-Making model, combined with a segmentation of equity derivatives in line with market indexes. At the same time, the contract specifications of all European equity options will be harmonized wherever possible. This is designed to further deepen order book liquidity.

More Transparency, More Liquidity, More Efficiency

Market-Making is a core element of the Eurex market model. The exchange already introduced Continuous Market-Making for selected products, and thus further improved order book quality. Since January 1, 2005, Eurex has made the new scheme available for all individual equity, equity index and EXTF options – initially alongside the current Regular Market-Making model.

The Continuous Market-Making model will have two separate components: Permanent Market-Making and Advanced Market-Making. Permanent Market-Making requires Market Makers to continuously quote for equity, equity index or EXTF options. The newly-introduced Advanced Market-Making comprises continuous quotation for pre-defined product packages. Currently, there are six of these available (see table below). More than 20 institutions have already committed to continuous quotation, including nine that have opted for Advanced Market-Making. Each of the defined, index-based quoting packages (Dow Jones EURO STOXXSM 50, DAX[®], SMI[®]) is currently covered by at least two Market Makers.

Advanced Market-Making Quoting Packages:

Dow Jones EURO STOXX SM 50 Index	Option on the Dow Jones EURO STOXX SM 50 Index. All equity options on Dow Jones EURO STOXX SM 50 index components.
DAX [®]	Option on the DAX [®] . All options on DAX [®] components.
SMI [®]	Option on the SMI [®] . All options on SMI [®] components.
Dutch stock options	All Dutch stock options listed on Eurex.
French stock options	All French stock options listed on Eurex.
Italian stock options	All Italian stock options listed on Eurex.

Under the new scheme, Market Makers will be obliged to maintain quotes, for a minimum quote size and subject to a maximum bid/ask spread, during 85 percent of the trading session. Maximum spread and quote size will depend on the liquidity of the underlying issue and the lifetime of the options.

By implementing the Continuous Market-Making model, Eurex will provide a higher-quality order book in all of its European equity, equity index and EXTF options, including products which are currently less liquid. Initial analyses have shown that in January, the number of quotes – and hence, liquidity – has increased by 60 percent compared to the average of the two previous months. Eurex market participants will thus benefit from new trading opportunities, thanks to enhanced liquidity and tighter bid/ask spreads. Taking advantage of the exchange's global liquidity network, they can exploit these new advantages quickly, efficiently and regardless of location. In particular, this will facilitate the on-exchange transaction of popular OTC equity options strategies, such as volatility dispersion and correlation trades.

Once the Continuous Market-Making scheme is fully operational, the current Regular Market-Making system will be transformed with the introduction of additional risk management tools into Permanent Market-Making in the course of the year.

Lowering the Cost of Trading

Participants in the Advanced Market-Making scheme will receive a 90 percent discount on the current contract fees.

Recognizing the higher potential risk exposure for Market Makers – given the stricter requirements of continuous quotation, with tighter spreads – Eurex will phase in new functionality to significantly mitigate such risks. Eurex will provide a **Market Maker Connection Monitor** during the roll-out phase of its European Equity and Equity Index Options Initiative. The software will monitor the connection between the Eurex back end and the Market Maker's MISS (**M**ember **I**ntegrated **S**ystem **S**erver). If the connection is interrupted, all outstanding quotes of the affected Market Makers will be automatically deleted, thus reducing the participant's exposure in the event of technical problems.

Throughout 2005, further features will be added, including **Heartbeat** and **Delta-protection**. Heartbeat will help the Market Maker to monitor the connection between the interface facing his quote machine and the Eurex back end. If a regular signal (the "heartbeat") exchanged between the interface and the Eurex back end is interrupted, all of the Market Maker's quotes will be automatically deleted.

The Delta Protection function monitors risk limits, such as the number of contracts traded and the Market Maker's delta and vega risk. Any exceeding of the Market Makers' predefined risk limits will trigger a mass deletion of all pending quotes. These risk parameters will be monitored at fixed time intervals defined by the Market Maker.

Mitigating the risk exposure for Market Makers, these functional enhancements will improve the quality of order books. Ultimately, all market participants will benefit from tighter bid/ask spreads, higher liquidity and lower transaction costs.

For any further information on the European Equity and Equity Index Options Initiative, please feel free to contact Axel Vischer on T +49-69-211-1 72 74, e-mail: Axel.Vischer@eurexexchange.com.

New Russell Futures Benefit from Extensive Network of Market Makers

Eurex US launched futures contracts on the U.S. large-cap Russell 1000® Index and the U.S. small-cap Russell 2000® Index on February 4, 2005. Thanks to extensive support by Market Makers and a three-month fee holiday, Eurex US customers around the world will benefit from new trading opportunities, at attractive cost.

Eurex US already received a firm Market-Making commitment from 15 members for the new Russell products. These firms will provide additional liquidity and increase order book depth by continuously quoting prices, at competitive bid/ask spreads. Market Makers will be active during the core U.S. trading hours (08:30 to 15:00 CST). Market Makers fulfilling set minimum trading volumes and complying with quoting obligations will be exempt from exchange fees for the first twelve months of trading. In addition, they will receive a financial incentive of USD 10,000 per month, for the first three trading months. The six most active Market Makers will continue to obtain this incentive for another three months. In addition to further incentives for those Market Makers generating the highest trading volumes in each of the two products, Eurex US will guarantee a share in the revenues to all Market Makers fulfilling their obligations.

Furthermore, Eurex US will waive all trading fees for all market participants for the first three months of trading in the Russell products. After this initial fee holiday, proprietary and Market Maker transaction fees will be USD 0.025 for trades executed in the order book and USD 0.30 per side for OTC trades. Customer transaction fees will be USD 0.50 per side for trades executed in the order book; OTC trades will be subject to a surcharge of USD 0.30 per side.

Contract Specifications: Russell 1000® and Russell 2000® Index Futures

Underlying	Contract Size	Delivery	Minimum Tick Size	Contract Months	Last Trading Day	OTC Block Trading
Russell 1000® Index	index × 100	cash settled	0.10 index points (USD 10)	March June	third Friday of the expiration month	250 minimum threshold
Russell 2000® Index			Calendar Spreads 0.02 index points (USD 2)	September December*		

*the three successive quarterly months within the March, June, September and December cycle

Eurex US Expands Short-Term USD Fixed Income Derivatives

As the only exchange worldwide, Eurex US launched 3 Year U.S. Treasury Note Futures and Options on Futures on February 1, 2005. Eurex US simultaneously modified the contract specifications of its 2 Year U.S. Treasury Note Futures. The exchange has thus created additional, attractive trading opportunities for its market participants at the short end of the U.S. yield curve.

The contract size of the new 3 Year U.S. Treasury Note Futures is USD 200,000 and the deliverable basket comprises U.S. Treasury Notes with a remaining term of between two years and eight months and three years and one month.

With the introduction of the new product, Eurex US continues to be the innovator in the U.S. market-place. At the same time the 3 Year U.S. Treasury products mark a new tradable point on the U.S. Treasury yield curve and will create extended trading opportunities for market participants active at the short end of the curve. Eurex US extended its product range in response to strong market demand in the light of the regular issuance activities of the U.S. Treasury Department in short-term U.S. Treasury Notes.

In addition, Eurex US has modified its 2 Year U.S. Treasury Note Futures and Options on these Futures as of February 1, 2005, raising the contract value from USD 200,000 to USD 1 million. The larger contract size has brought the new 2 Year Jumbo U.S. Treasury Note Futures in line with ticket sizes in the cash market. As the transaction fees per contract traded have remained unchanged, Eurex US has, in effect, cut transaction costs by factor five. The range of deliverable maturities has also been extended to include bonds with a remaining term between one year and six months and two years and three months. (The previous delivery window ranged from one year and nine months to a maximum of two years.) Deliverable bonds must have been issued with an original term not exceeding three years and three months (down from five years previously).

Further information, such as detailed contract specifications and vendor product codes, is available from the Eurex US website www.eurexUS.com. Or contact the Eurex US Sales Team, T +1-312-544-1100, e-mail: info@eurexUS.com.

Treasury Futures Incentive Program to be Continued in 2005

Eurex US will continue to offer a package of incentive programs to further increase trading activity in its U.S. Treasury futures segment in 2005. In addition to an enhanced U.S. Market Maker program, the multi-year revenue-sharing initiative started in 2004 will be continued.

Market Makers who already participated in the 2004 program may now choose between two product groups in which they want to make markets – the short end of the U.S. yield curve (2 Year, 3 Year, and 5 Year Treasury Notes products), or the long end (10 Year and 30 Year Treasury Bonds products). Each Market Maker will undertake to trade a minimum volume of 10,000 contracts in the chosen product group. Provided that they also fulfill their quoting obligations, Market Makers will be entitled to a financial incentive of USD 5,000 per month, during the first three months of 2005.

From April 2005 onwards, the most active Market Makers will receive an incentive payment of USD 10,000 per month if all requirements are fulfilled. All Market Makers will generally receive a credit for each contract traded. Those fulfilling all requirements (minimum trading volume and quoting commitments) will double their volume credit.

Furthermore, Eurex US will distribute a minimum of USD 5 million in 2006 revenues to the participants of its revenue-sharing program, to be split among participants on the basis of their share in trading activities 2005. All Market Makers and members who participated in the 2004 revenue-sharing program are eligible for the new program, by receiving credits for each contract traded between January 1 and August 31, 2005. Members who trade at least 3,000 contracts per day for at least 15 trading days per month between January 18 and August 31, 2005 will double their volume credit. First advanced payment will be distributed in September 2005.

For any further information, please feel free to contact the Eurex US Sales Team on T +1-312-544-1100, e-mail: info@eurexUS.com.

EUREX REPO

Eurex Repo Achieves Record Growth in 2004

Eurex' electronic repo markets continue to enjoy strong growth, despite the rather lacklustre situation prevailing in global bond markets. Average outstanding volumes – the key measure for the strength of repo markets – further increased in 2004, as did the number of trading participants. Meanwhile, preparations for Euro GC Pooling® are in full swing. The new product is expected to boost growth even further.

The average outstanding volume on Eurex Repo as of end-December 2004 was up around 21.7 percent year-on-year, totaling EUR 52.9 billion. The Euro Repo Market proved to be particularly strong: by the end of November, average outstanding volumes had reached a total of EUR 15.9 billion, an increase of 33.4 percent on the previous year. The Swiss Franc Repo Market did also well: here, average outstanding volumes rose to a total of CHF 55.6 billion, up by 17.3 percent year-on-year.

2004 saw the admission of another eight banks and financial services providers from Great Britain, France, Germany and Switzerland, bringing the total number of institutions now actively trading on Eurex Repo to 155 from nine different countries. This has allowed the platform to further strengthen its position as the leading pan-European marketplace for repo trading.

As announced, the launch of the Euro GC Pooling® initiative is scheduled for March 17, 2005. With the new product, Eurex Repo will facilitate cash-driven international trading in a General Collateral Basket, which comprises more than 9,000 fixed income securities, which are eligible as collateral for

ECB repo transactions. This will invariably enhance efficiency with respect to both trading and the collateral management of collateralized money market transactions, thus helping repo market participants to further optimize their use of collateral.

Eurex Repo successfully completed the technical preparations for the launch of Euro GC Pooling® at the end of November, 2004. From the end of February, 2005, Euro GC Pooling® participants will have access to a simulation environment to thoroughly test the entire processing chain – from GC Pooling quote entry through to GC Pooling collateral management.

Further information is available on the Eurex Repo website at www.eurexrepo.com. In case of questions, please feel free to contact Gabriele Ristau on T +49-69-211-15741, e-mail: Gabriele.Ristau@eurexchange.com or Ebru Ruffet on T +49-69-211-19422, e-mail: Ebru.Ruffet@eurexchange.com.

Trading on Eurex Increases More Than 20 Percent to 80 Million Contracts in December

- Eurex ends 2004 with a new record year
- Open interest at around 61 million contracts

Eurex has closed out 2004 with a record volume of 1.07 billion contracts (2003: 1.014 billion contracts), thus remaining the world's largest derivatives exchange. In December 2004, trading volume continued to rise on Eurex: 80.4 million contracts were traded and settled, an increase of around 22 percent year-on-year (December 2003: 65.98 million contracts). At around 61.3 million contracts, open interest rose by around 35 percent year-on-year.

The products with the strongest volumes in December were once again the interest rate segment, which accounted for approximately 46 million contracts, an increase of around 42 percent over December 2003. The Euro-Bund Futures contract was

once again Eurex's most successful product at 20.2 million contracts, a rise of near 50 percent year-on-year. Trading volume in the Euro-Bobl Futures was up 35 percent year-on-year at 12.5 million contracts, while trading in the Euro-Schatz Futures rose 27 percent, to 9.2 million contracts.

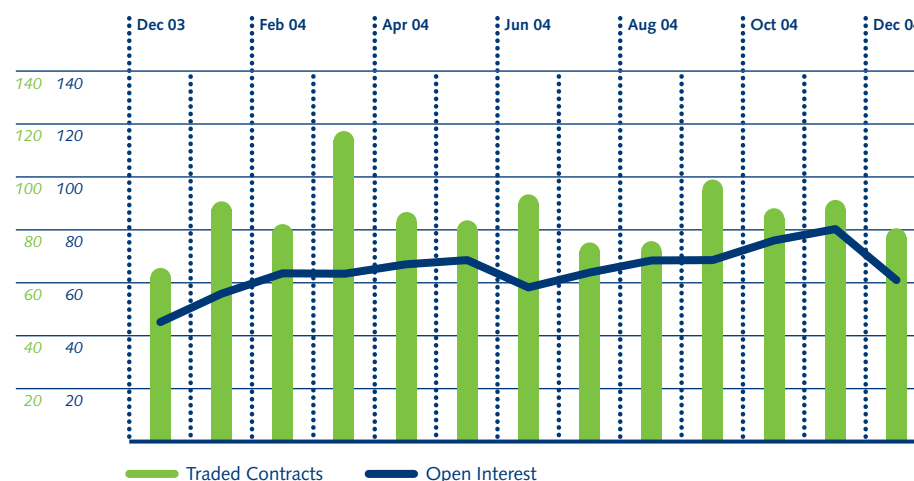

34.6 million contracts were traded in equity-based derivatives (December 2003: 33.8 million contracts), 21.6 million of which were equity index derivatives and 13.0 million where equity options. The most heavily traded contract among the equity index derivatives was the futures on the Dow Jones EURO STOXXSM 50 Index with 10.5 million contracts, which is a rise of more than eleven percent on the previous year. Open interest in this product set a new record, reaching 1.95 million contracts by mid-December. The most traded stock option in December was Allianz, with 1.46 million contracts.

For more information, please contact products@eurexchange.com.
