# Eurex Extends Service Offer for OTC Traders

Eurex is not only the leading derivatives exchange – the opportunities it offers for off-exchange (OTC) trading are just as attractive. OTC traders entering their business into the Eurex system benefit from low fees, standardized process flows, a performance guarantee by Eurex's Clearing House, plus a host of OTC trade support functions. Turnover data clearly shows that OTC market participants increasingly exploit these benefits: Block trade volumes in equity options, for example, were up 46 percent year-on-year in May 2005.

With the capping of fees for large block transactions in equity options, effective January 1, 2005, Eurex has taken an important step to make OTC trading even more attractive.

## Wholesale Pricing for Equity Options Leads to Significantly Lower Fees

For large block trades in German, Swiss and Nordic equity options, Eurex has capped fees at the amount incurred for trading 2,000 contracts; for Dutch, French and Italian equity options, the threshold was set at the fee for 1,000 contracts. Since it is common practice in OTC trading to trade order sizes of 2,000 contracts or more, market participants greatly benefit from this cap.

## Wholesale Pricing for Eurex Equity Options

Equity options	Number of Contracts	Adv. Market Makers	Perm. Market Makers	Reg. Market Makers	Agent/Principal Trading
French, Dutch, Italian	1,000	EUR 20	EUR 40	EUR 40	EUR 200
German	2,000	EUR 40	EUR 80	EUR 80	EUR 400
Nordic	2,000	EUR 100	EUR 200	EUR 200	EUR 1,000
Swiss	2,000	CHF 120	CHF 160	CHF 240	CHF 800

## Example: Agent/Principal Trading – Wholesale Pricing Effects

## Comprehensive Service Offer for OTC Traders

Of all OTC trading functions, the OTC Block Trade facility (Block Trade Entry window) is of prime importance. It allows market participants to enter OTC trades into the Eurex system, subject to a certain minimum size. Building on this functionality, Eurex has continuously extended its OTC service offer during the last few years.

For example, the OTC trading function **Exchange for Physicals (EFP)** facilitates the entry of fixed income futures trades, agreed outside the exchange trading system, to match an underlying cash market transaction. Meanwhile, any standard debt security denominated in euros or Swiss francs can be used to create EFP trades. Complementing the OTC facilities, EFP and Block Trade Entry, the **Exchange for Swaps (EFS)** function has been developed to facilitate the entry of OTC fixed income futures trades, where the underlying transaction is a euro-denominated interest rate swap.

To make the entry of options combinations and volatility trades into the Eurex system easier, the exchange has developed the **Strategy Wizard** – a dedicated graphical user interface for strategy trading. With the Strategy Wizard, Eurex offers its customers a highly intelligent and powerful tool that can be flexibly used for up to 45 pre-defined options trading strategies. OTC traders may also use this facility, to enter combination trades agreed over the phone.

Only six months following its introduction (within the scope of the current Eurex Software Release 7.0), a daily average of 290,000 contracts is traded using the Strategy Wizard, 75 percent of which are OTC trades.

#### Strategy Wizard: Turnover OTC versus Order Book (Number of Contracts)

#### In the Pipeline: OTC Flex Options Facility and EFP for Index Futures

With Release 8.0 scheduled for production on November 7, 2005, Eurex will further extend the range of available OTC trading functions. For instance, the new OTC Flexible Options facility offers greater flexibility for option trading – in so far as traders will be able to enter even non-standardized options contracts (i.e. option contracts which can be individually agreed upon in terms of exercise price, expiry date/time and style) into the system. Meanwhile, the extension of the EFP function to also include index futures provides new index trading opportunities – particularly for portfolio/program traders, who will then be able to easily gain long or short equities exposure using index futures.

### **Standardized Process Flows and Central Counterparty Add Great Value**

In an age where the cost of credit is becoming increasingly important, OTC trades are done bilaterally without a Clearing House to guarantee the transaction. Not only does this lead to a clustering of counterparty risk – it can be credit intensive, using up valuable liquidity. With Eurex's OTC trading facilities, these risks do not occur.

Upon entry into the Eurex system, all OTC trades are automatically passed on to Eurex Clearing AG, which becomes the central counterparty to both buyer and seller. Thanks to the straight-through processing based on Eurex Clearing's tried-and-tested processes, while at the same time eliminating the counterparty risk, customers benefit from the nearly full elimination of their credit risk. This greatly enhances capital efficiency and, in the end, the return on equity.

### **Successful Coexistence of On- and Off-Exchange Trading**

The new and flexible OTC facilities offer attractive trading opportunities, particularly to institutional users. At the same time, the order book has been given a boost from the Continuous Market-Making scheme, introduced at the beginning of 2005. Eurex therefore offers its customers a reliable one-stop shop – both for order book and OTC trading.

## **EQUITY DERIVATIVES**

### **Closer Exercise Price Intervals**

**Eurex has decided to adjust its exercise price intervals for short-term options contracts, with effect from May 23, 2005, due to the currently low level of volatility in stock markets. Market participants will thus be able to react flexibly, even to small price movements in the underlying cash market.**

Additional exercise prices are now available for lifetimes of up to three months, for exercise price ranging between EUR 10 and EUR 50 or CHF 10 and CHF 50, respectively. The new rules apply to all at-the-money EXTF and stock options – except for stock options on Italian and French shares, where exercise price intervals are already very tight.

An up-to-date version of the corresponding Rules and Regulations is available from the Eurex website at [www.eurexchange.com](http://www.eurexchange.com) > **About Eurex > Rules and Regulations > Contract Specifications > Changes to the Contract Specifications**. For any further information, please feel free to contact Ines Hulinsky on T +49-69-211-15698, e-mail: [Ines.Hulinsky@eurexchange.com](mailto:Ines.Hulinsky@eurexchange.com).

## New: Equity Options on Finland's Fortum Oyj and Neste Oil Corporation

On May 23, 2005, Eurex introduced options as well as Low Exercise Price Options (LEPOs) on the shares of Fortum Oyj. In addition, on June 20, 2005, the exchange will launch options and LEPOs on the shares of Neste Oil Corporation, the Fortum Oyj spin-off.

The contract specifications of the new Fortum Oyj and Neste Oil Corporation options are in line with the standard for various Nordic equity options already existing: they have a contract size of 100 shares and are available with lifetimes of up to twelve months.

Upon launch, both new stock options are being added to the quoting package for Advanced Market-Making in the Nordic segment, now including options on Fortum Oyj and Neste Oil Corporation, as well as on Nokia, Stora Enso, TeliaSonera, Elisa, Tieto Enator, UPM-Kymmene and Sampo. With the inclusion of Fortum Oyj, OMXH25 index options were removed from the package.

For more detailed information on the new stock option, please refer to the Eurex website at [www.eurexchange.com](http://www.eurexchange.com) > **Products**; or feel free to contact Ines Hulinsky on T +49-69-211-15698, e-mail: [Ines.Hulinsky@eurexchange.com](mailto:Ines.Hulinsky@eurexchange.com).

### EQUITY INDEX DERIVATIVES

## Open Interest in Dow Jones EURO STOXX® 50 Index Options in Excess of 17 Million Contracts

Eurex continuously strengthens its position as the leading trading platform for European index options: In May 2005, open interest in Dow Jones EURO STOXX® 50 Index Options reached a new record high, as did open interest in Dow Jones STOXX® 600 Sector Index Futures.

In May, open interest in options on the Dow Jones EURO STOXX® 50 Index significantly increased from the level seen at year-end 2004 (twelve million contracts) to exceed 17 million contracts for the first time.

Open interest in Dow Jones STOXX® 600 Sector Index Futures stood at 60,000 contracts at month-end, compared to only 12,000 contracts by the end of 2004.

## 50th Eurex Clearing License for London-based Members

In May 2005 Eurex Clearing AG has granted its 50th Clearing License to a London-based Clearing Member. The increased demand for clearing services proves the success enjoyed by Eurex in London: Thanks to the broader availability, London-based financial institutions benefit from much greater flexibility and efficiency for the settlement of their Eurex trades.

Eurex Clearing AG introduced the concept of remote clearing back in August 2000. Thanks to this concept, the scope for direct access to Eurex's Clearing House was no longer been restricted to institutions in Germany and Switzerland, but was extended to include financial services providers throughout the EU. Large, international players in particular have benefited from a significant increase in efficiency – a significant improvement over the former regulations (which restricted Clearing Membership to Germany and Switzerland), where trading and clearing were often split across locations.

At the time, the clearing licenses granted related only to the clearing of transactions concluded on the Eurex trading platform. Since the launch of Eurex Bonds and Eurex Repo in October 2000 and June 2001, respectively, Eurex Clearing AG has also been granting clearing licenses for cash bonds and repo transactions. In addition, in March 2002, Eurex Clearing AG assumed the role of central counterparty in equity trading.

Of the 50 clearing licenses currently granted to members in London, 24 relate exclusively to the derivatives business. Another ten licenses are for Eurex Bonds, with Eurex Repo accounting for another five clearing licenses, and the remainder of eleven granted for equity trading.

For any further information, please feel free to contact Manuela Arbuckle on T +49-69-211-272 26, e-mail: [Manuela.Arbuckle@eurexchange.com](mailto:Manuela.Arbuckle@eurexchange.com). A current list of Eurex Clearing Members is available from the Eurex website at [www.eurexchange.com](http://www.eurexchange.com) > **Market Access** > **Member&Vendor Search**.

# Eurex Turnover in April up 21 Percent Year-on-year

- 104 million contracts changed hands in April
- Year-to-date turnover rises to new record of 416 million contracts
- New records in Dutch and German stock options
- Open interest in Euro-Schatz Futures and Euro-Bobl Futures over one million contracts

The international derivatives market Eurex traded and cleared 104 million contracts in April, 21 percent more contracts than in the same month last year (April 2004: 86 million contracts). Eurex continues to achieve record growth. An average of five million contracts were traded each day in April.

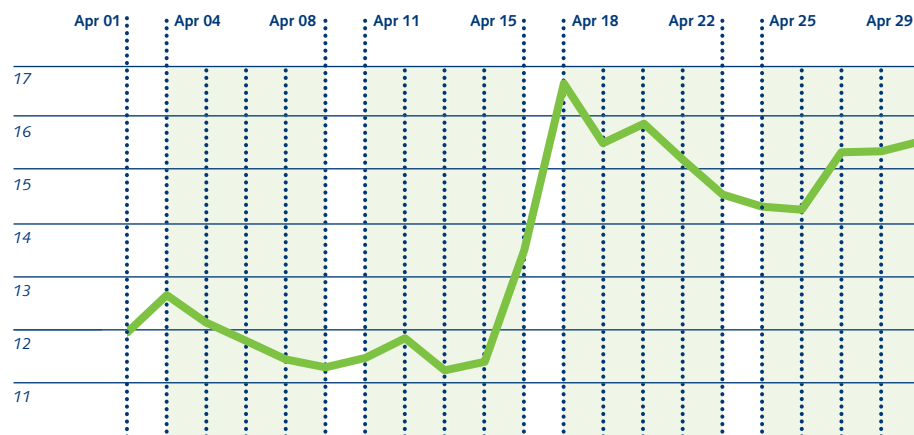

Equity based derivatives were the strongest segment at Eurex, with around 54.5 million contracts traded; 26.8 million of these based on equity index derivatives and 27.7 million on equity derivatives. Eurex enjoyed particular success in trading with Dutch and German stock options. In April, the derivatives market set a new record of 1.6 million contracts in Dutch stock options. The previous record from February 2005 stood at 1.1 million contracts. The April trading volume represents a rise of 180 percent compared to April 2004 (approximately 570,000 contracts). German stock options also set a new record of approximately 18 million contracts, breaking the previous record of 14 million contracts, set in January 2004. This figure represents a rise of 40 percent compared to April 2004 (12.9 million contracts).

Around 50 million contracts were traded in the Interest Rate Derivatives segment, a rise of eleven percent year-on-year. Euro-Bund Futures remained the most successful product at Eurex with 22 million contracts, an increase of 23 percent year-on-year (April 2004: 18 million contracts). Approximately eleven million contracts were traded in Euro-Bobl Futures. Ten million contracts were traded in Euro-Schatz Futures, a rise of 8.5 percent year-on-year. Furthermore, open interest in Euro-Schatz Futures exceeded one million contracts for the first time. Open interest in Euro-Bobl Futures stands at over one million contracts and is also at record levels. Open interest, that is the number of open positions, is regarded as an important indicator for the future performance of a contract.

Approximately EUR 9 billion (single counting) was traded in April on the electronic trading platform Eurex Bonds, which rounds out Eurex's fixed income product range. Eurex Bonds' Jumbo Pfandbriefe segment recorded monthly trading volume of approximately EUR 2 billion, a rise of over 100 percent year-on-year. Trading volume in the European Covered Bonds segment, introduced in November 2004, rose 127 percent on the previous month's figures to EUR 331 million in April (March 2005: EUR 146 million).
