Introduction	Page 6

1 Introduction

This document provides an overview of the enhancements to the Eurex VALUES API that become effective with the introduction of Eurex Release 11.0 as compared to the current version, Eurex Release 10.0.

The new VALUES documentation will be published as

**VALUES API Member Front End Development Guide
Volume 2 - Eurex Application Requests and Responses
Planning Version**

This document will be available on the Eurex website

<http://www.eurexchange.com>

The Documents will be located under the path

Member Section → Releases → Eurex 11.0 → Interfaces → VALUES API.

For the publication dates of the above-mentioned document, please refer to the Eurex Release 11.0 Communication Calendar.

2 Backward Compatibility

Eurex Release 11.0 will be a mandatory release. Thus, its current technical application version number (AVN) will be changed to XEUR_AVN_110 = 110.

A layout-level backward compatibility will be offered to applications built for Eurex Release 10.0. This means that applications that use `applVersion = XEUR_AVN_100` are expected to send the request layouts used in Eurex Release 10.0 and will still be supplied with Eurex Release 10.0 response layouts.

As usual, new contents of existing fields are not suppressed in the backward compatibility mode. Newly introduced functionality cannot be used in the backward compatibility mode.

In several cases removed functionality cannot be used in the backward compatibility mode. For more details refer the following sections.

3 Changes in the VALUES Call Interface

Eurex Release 11.0 will be shipped with the unchanged GATE Release 3.5, which will also be a mandatory release. For this purpose, the installation of the GATE Release 3.5 as well as the Eurex Release 11.0 software kits are required.

4 Changes in Application Requests

In this chapter the changes to existing request, response, subject and broadcast layouts are described per application request. Unless stated otherwise, backwards compatibility is provided for all application requests with a changed layout.
