

# Cloud Prisma Margin Estimator

## TAKING MARGIN SIMULATION TO THE CLOUD

**The Cloud Prisma Margin Estimator (Cloud PME) is Eurex Clearing's cloud-based solution for margin simulations under Prisma, Eurex Clearing's margin methodology.**

The service is free of charge and specifically tailored for end users who wish to simulate margin requirements for Exchange Traded Derivatives (ETDs) or OTC interest rate swaps with or without cross margining or single-ISIN (special) Repos. Cloud PME is easy to use and is accessible via any web browser's GUI. Users may enter individual ETD positions or portfolios directly into the GUI or upload ETD/OTC/REPO portfolios in several formats, and the resulting margin is directly available in the GUI. More advanced or technically adept users can also connect to the service via an API, allowing for a high degree of flexibility and automation.

### Try for yourself

- Eurex Cloud PME GUI:  
<https://eurexmargins.prod.dbgservice.com>
- API documentation:  
<https://app.swaggerhub.com/apis/dbgservice/cPME/2.0>

## What are the key benefits?

### Transparent calculation

Free tool which provides transparency on Eurex Clearing's Prisma margin requirements with the accuracy of Eurex Clearing's production systems for ETD and with high accuracy for OTC/REPO.

### Portfolio-based margin simulation

Allows clients to readily simulate margin requirements for single positions and portfolios under the Prisma methodology.

### Usable via GUI and API

Provides margin simulation in a user-friendly environment and hassle-free integration with client systems and processes via GUI and REST API.

### Cloud-based set-up

By running margin simulations in the cloud, you are sure to always use the latest version of Prisma and benefit from up-to-date features.

### Continuous development

Releasing new features and Prisma margining for other asset classes based on client demand.
