[...]

2.1.5.1 Transaction Type Specific Novation Criteria

The following Transaction Type specific novation criteria must be fulfilled for OTC Interest Rate Derivative Transactions (based on the Trade Record transmitted to Eurex Clearing AG via the ATS):

[...]

[...]

(10) Fixed rate and floating rate spread schedules

IRS (but not ZCIS, OIS or FRA) may have a fixed rate and a floating rate spread schedule, i.e. a fixed rate or floating rate spread may vary across the calculation periods relative to their value in the relevant preceding calculation period provided that any such change to the fixed rate or the floating rate spread may only occur at the start of the relevant calculation period and must be pre-determined and specified in the Trade Record submitted via the ATS. Fixed rate or floating rate spread schedules are not eligible for zero coupon payments or payments made on a compounding basis.;

[...]

(12) Notional amount

[...]

Except for ZCIS and FRA, the notional amounts can be different for each swap leg and may vary across the calculation periods relative to their value in the relevant preceding calculation period. The changes in notional can only take place at the start of the calculation periods and must be pre-determined and specified in the Trade Record submitted via the ATS. Changes in the notional amount across calculation periods may not be specified for ZCIS and FRA, OIS nor for IRS with swap legs under which amounts are payable on a compounding basis or in the form of a zero coupon payment.;

[...]

[...]

(17) Compounding

The floating leg (incl. spread) of an IRS can be subject to Compounding (also referred to as "S-straight eCompounding" if Flat Compounding is not specified as applicable) or Flat Compounding, each as defined in Number 2.2.4 below. Only standard monthly, quarterly, semi-annual and, in case of EUR and GBP only, annual floating rate indices can be referenced for payments made on a Straight"straight" Compounding or Flat Compounding basis, i.e. no Interest Rate Stub Periods may be specified for such OTC Interest Derivative Transactions;

For the fixed leg, neither Straight"straight" Compounding nor Flat Compounding may be selected in the ATS. However, a fixed rate can be specified under the zero coupon option which would result in one fixed payment at swap maturity for the fixed leg only applying the provided fixed rate subject to the applicable terms of calculation such as business day conventions and day count fractions. Alternatively, a lump sum can be entered manually that would be paid unadjusted on the last payment date of the relevant zero coupon swap.
