March 2024

Agenda

- 1 Challenges in the Current Market Environment
- 2 FTSE[®] 100 Index Product Suite
- 3 Volume Since Launch
- 4 FTSE[®] 100 Index Total Return Future
- 5 FTSE[®] 100 Index Dividend Future
- 6 FTSE[®] 100 Index Future & Option
- 7 Margin & Pricing
- 8 Contacts

Challenges in the Current Market Environment

Uncleared Margin Rules

- UMRs drive the swaps market from **OTC to listed**
- Buy-side clients are becoming more aware of **margin optimization** allowing for increased leverage and profits

Trading Fragmentation

- Holding positions across **multiple exchanges** etc. implies **illiquid** markets and **higher costs** of trading
- Absence or insufficient use of **margin offsets**

Financing Risk During Dividend Season

- Stressed market conditions generate **uncertainty over dividend payments**
- Due to **uncertainty over repo levels** and **large financing risks**, the quarterly future rolls are historically volatile

Market Players Need

- **Flexibility** of the OTC market with **operational exchange efficiency**
- Ability to reduce **counterparty risk** and mitigate **capital, collateral** and **balance sheet pressures**
- **Price transparency** and **anonymity of the trade**
- Advantage of the **largest liquidity pool for TRFs**, Margin compression and increased synergies with Index Futures & TRFs on the same platform
- An alternative for the regular price index future as **Delta One Beta replacement** with short term TRFs
- An instrument with **less pricing sensitivity to dividends** compared to price return futures
- Attract new clients eager to invest in **repo as a new asset class**

FTSE® 100 Index Total Return Future Term Structure

Relative steepness of the term structure provides trading opportunities

FTSE® 100 Index TRF (TTUK) Spread comparison

FTSE® 100 Index Total Return Future

Product Structure

Underlying Indices

- FTSE® 100 Index (UKX)
- FTSE® 100 Cumulative Dividend Points Index
- Sterling Overnight Index Average (SONIA)

TRF Spread

- Executed in basis points via the T7 trading system is converted in index points in order to determine the futures price in index points.

Trade Types on Eurex T7 Trading System

- Trade at Index Close (**TAIC**) with an equity strike level based on index close (e.g., UKX Close).
- Trade at Market (**TAM**) based on custom-defined equity strike level provided by the investor.

Contract Position

- TRF contracts will represent the theoretical exposure to the underlying index at trade date assuming holding to expiry.
- The holder of a long position will receive the distributions associated with holding the cash basket, against which they will pay the funding associated with this purchase.

Counterparty
A (Buyer =
Long TRF)

The Buyer **Receives** Total Equity
Returns

The Buyer **Pays** (SONIA + TRF
Spread %)

Counterparty
B (Seller =
Short TRF)

Cost of Funding

- Made up in part by the overnight funding rate (SONIA) and the traded TRF Spread.

Parameters

- Quoted and traded in spread terms to insulate the financing component in a transparent manner for the dealers / clients who want to play the repo rate.
- Total returns will be incorporated into the Daily Settlement price and the daily profit and loss will be paid as a daily cash-flow via the regular variation margin process.

(Equity Performance + Distributions) = (Funding + TRF Spread)

“Quoted” TRF Spread = Equity Performance + Distributions – Funding

Contract Specifications - TTUK

FTSE® 100 Index Dividend Future

Product Summary

Dividend Focus & Details

- The FTSE® 100 Index Dividend Futures are a traded derivative contracts that focus purely on the dividend element of a widely used and traded equity index.
- The dividends included would be the ordinary unadjusted gross cash or cash equivalent dividends declared and paid on the individual equity components of the respective index in the contracts specified period.

Dividend Stream Exposure

- The FTSE® 100 Dividend Future contract enables investors to take a view on the gross cumulative cash dividends during an annual period.
- This allows investors to buy or sell the index dividend futures at the prevailing level of these dividend payments for the required number of periods.

Separate Trading of the Dividend Element of the FTSE Index

- Improves risk sharing and increases users' ability to focus on the fundamentals that determine equity values.

Product Structure

Metrics

- Gross index dividend points will be calculated using price index level of the FTSE Parent Index (divisor).

Methodology

- The FTSE Dividend Points Indexes methodology is aligned with the FTSE Global Investable Market Indexes methodology, where dividend reinvestment occurs on ex-date. The dividend points will contribute to the FTSE Dividend Points Index levels on the ex-dividend date.

Calculation

- The total dividend value is calculated as the sum of the Dividend Per Share (DPS) multiplied by index shares for all constituents of the Parent Index, which have a dividend going ex on that date.

Formula

$$GrossIndexDVP_t = \sum \frac{DTRIndexNOS * GrossDividendPerShare_t / FXrate_t}{PriceIndexDivisor_t}$$

Contract Specifications - FTDD

	FTSE [®] 100 Index Declared Dividend Futures (FTDD)	Bloomberg: IUBA Index Reuters: 0#FTDD:

Minimum Block Trading Size	500	

Margin Offsets

Eurex can offer significant margin offsets between TRFs and equity derivatives in PRISMA. The majority of delta for TRS are done using listed equity index products such as index futures, synthetics forward (using listed options) and dividend futures.

Portfolio	Expiry	Product Long	Product Short	# Long	# Short	Initial Margin	IM in % of Notional	Portfolio Effects
FTUK 1st	202106	FTUK 1st		1		6846,84	9%

Note: The data is only indicative, calculated on April 27, 2021. Please do not use it for productive purposes.

Pricing

Pricing is configured on standard Eurex elements

- Transaction (Trade) Fee
- Cash Settlement Fee

Assumption is that initial trade migration will be similar to on-boarding of TRS i.e. large bilaterally negotiated trades introduced using TES – hence Block Trade Fees are equivalent to Orderbook.

Fee Type	Execution Type	Account	FTSE® 100 Index Futures (FTUK)	FTSE® 100 Index Options (OTUK)	Reduced Fee	Threshold	FTSE® 100 Index Total Return Futures (TTUK)	FTSE® 100 Index Declared Dividend Futures (FTDD)
