Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland and Eurex Zürich
1. Part: Contract Specifications for Futures Contracts

1.19 Subpart: Contract Specifications for FX Futures Contracts

1.19.3 Term

(1) For FX Futures Contracts, terms expiring on the final settlement day (Subsection 1.198.4 Paragraph 1) of the next three months, the next three quarter expiration months (March, June, September, December) and the next four half year expiration months (June, December) are available for trading at the Eurex Exchanges.

(2) After the expiry of FX Futures Contracts according to Paragraph 1, the introduction of subsequent contracts shall be the second exchange day after the last trading day of the respective expiry month.

2. Part: Contract Specifications for Options Contracts

2.13 Subpart: Contract Specifications for FX Options Contracts

2.13.8 Introduction of New Options Series

For an existing expiration month, the introduction of options series with new exercise prices at the beginning of the Pre-Trading Period of a given Exchange day shall take
place at the latest at the point in time at which the minimum number of exercise prices in-the-money, at-the-money or out-of-the-money specified in Subsection 2.13.7, based on the last determination of the exchange rate between the respective base and quote currency, is no longer available on the Eurex Exchanges at the close of trading of such options contract. In the event that there is no exchange rate between the base and quote currency that is available on the Eurex Exchanges at the close of trading of the options contract (as determined by the Eurex Exchanges), the Eurex Exchanges may, for the purposes of this provision, determine such exchange rate at their discretion.

A new option series shall generally not be introduced if it would expire in fewer than five Exchange days, unless market conditions make such introduction necessary.
