Eurex Repo Functional Information

Eurex Repo F7 production update v3.7 – Mandatory API / FIX Gateway upgrade

Contact: Eurex Repo Sales

Importance: High Priority

Summary:

The **Eurex Repo F7 PRODUCTION environment** will be **updated** to version **F7 release 3.7 on Saturday, April 9th, 2022**.

On Saturday evening, an [Implementation News](#) will announce the completion of the update. After the update, the production system will be technically available in unattended mode (none technical support).

With the start of the business day on **Monday, April 11th, 2022** the software version for Repo F7 production will be **003.760.000**.

Release 3.7 includes GUI enhancements as well as **mandatory upgrades to the F7 API and F7 FIX Gateway**.

Any API system interfacing to F7 **must** be updated to the latest API and XSDs.

As release 3.7 is a mandatory API upgrade, the **only valid value for API VERSION NUMBER is: 3.7**

Release 3.7 includes the following enhancements:

- Core enhancements
 - C7 SCS readiness
 - Clearing timestamp
 - GC Pooling Account Migration readiness
 - Clearing Agent`s approved/preferred counterparties
 - Clearing Agent trade approval in GC Repo
- F7 GUI specific enhancements
 - Custom View Enhancements

	<p>Known Limitation: users may experience slow performance when switching between Custom Views.</p> <p>Recommendation: customize each Custom View to save only the landing page screens that are always needed. The performance will be better when fewer landing page screens are open. Quote Book and Pre Trade Manager screens are especially time consuming.</p> <p>Eurex Repo is working with priority to introduce performance improvements as soon as possible.</p>
--	--

- Choice prices on Market Watch
- Clearing timestamp
- Clearing Agent screen enhancement
- Securities screen enhancement

- Column chooser in all master data screens
