

\*\*\*\*\*

PART 3 IS BEING NEWLY INSERTED

\*\*\*\*\*

[...]

### **3. Part: Contracts Off-Book**

Regardless of the trade type, the following general entries must be made into the systems of the Eurex Exchanges for off-book trades:

- Contract
- Contract price
- Number of contracts traded (quantity)
- Parties involved in the off-book trade
- Clearing information

The mandatory entries for each specific transaction type are set out below in the Subparts relevant to these transaction types.

#### **3.1 Subpart: Entry Intervals for Contract Prices**

The contract price of Off-Book Trades pursuant to Number 4.3 of the Conditions for Trading at Eurex Deutschland and Eurex Zürich must lie within an entry interval determined by the Management Boards in accordance with this Subpart.

##### **3.1.1 Entry Intervals for Futures Contracts**

The entry intervals for Futures Contracts are determined using the parameters described below. The Management Boards may deviate from these intervals in exceptional cases where it is not possible to determine the intervals using the parameters described.

The upper limit of the admitted entry interval results from the daily settlement price for the respective Futures Contract on the previous trading day pursuant to Chapter II Part 2 No

2.1.2 (2) a) - e) of the Clearing Conditions of Eurex Clearing, plus an amount of 20 percent of the margin parameter defined for this contract by Eurex Clearing AG (available online at [www.eurexclearing.com](http://www.eurexclearing.com)). If the daily high of the Futures Contract determined for the respective futures contracts on the Eurex Exchanges on this trading day, or the synthetic daily high of the Futures Contract exceeds the value pursuant to Clause 3, the upper limit of the admitted entry interval results from the higher of such two values, respectively. In order to determine the upper limit of the admitted entry interval, the value determined pursuant to Clause 3 and 4 shall respectively be increased by:

5% in case of Futures Contracts on shares with group ID BR01, CA01, CA02, US01 and US02, as assigned pursuant to Annex A, Commodity Index Futures Contracts, Property Index Futures Contracts, Precious Metals Futures Contracts and FX Futures Contracts;

4.5% in case of Futures Contracts on share dividends and Index Dividend Futures Contracts;

2% in case of MSCI Index Futures Contracts, Eurex Daily Futures on Mini KOSPI 200 Futures and Daily Futures on TAIEX Futures and TA-35 Index Futures Contracts;

- In case of LDX IRS Constant Maturity Futures Contracts:

Product	Value increased by
GE02 - GE03	1.00%
GE04 – GE10	1.50%
GE11 – GE13	2.00%
GE14	2.50%
GE15 – GE18	3.00%
GE19 – GE22	3.50%
GE23 – GE25	4.00%
GE26 – GE30	4.50%

and

0.2% in case of other Futures Contracts.

The lower limit of the admitted entry interval results from the daily settlement price of the respective Futures Contract of the previous trading day pursuant to Chapter II Part 2 No 2.1.2 (2) a) - e) of the Clearing Conditions of Eurex Clearing AG, minus an amount of 20 per cent of the margin parameter respectively defined for this contract by Eurex Clearing AG. If the daily low of the Futures Contract determined for the respective Futures

Contracts on the Eurex Exchanges on this trading day or the synthetic daily low of the Futures Contract is less than the value pursuant to Clause 5, the lower limit of the admitted entry interval results from the lower of such two values respectively. In order to determine the lower limit of the admitted entry interval, the value determined pursuant to Clause 5 and 6 shall respectively be reduced by:

- 5% in case of Futures Contracts on shares with group ID BR01, CA01, CA02, US01 and US02, as assigned pursuant to Annex A, Commodity Index Futures Contracts, Property Index Futures Contracts, Precious Metals Futures Contracts and FX Futures Contracts;
- 4.5% in case of Futures Contracts on share dividends and Index Dividend Futures Contracts;
- 2% in case of MSCI Index Futures Contracts, Eurex Daily Futures on Mini KOSPI 200 Futures and Daily Futures on TAIEX Futures and TA-35 Index Futures Contracts;
- In case of LDX IRS Constant Maturity Futures Contracts:

Product	Value decreased by
GE02 - GE03	1.00%
GE04 – GE10	1.50%
GE11 – GE13	2.00%
GE14	2.50%
GE15 – GE18	3.00%
GE19 – GE22	3.50%
GE23 – GE25	4.00%
GE26 – GE30	4.50%

and

0.2% in case of other Futures Contracts.

The synthetic daily high shall be determined as the result of the actually traded daily high in all expiration months and the price margins between the daily settlement prices of the different expiration months of the respective Futures Contract.

The synthetic daily low shall be determined as the result of the actually traded daily low in all expiration months and the price margins between the daily settlement prices of the different expiration months of the respective Futures Contract.

### **3.1.2 Entry interval for Futures Contracts on short-, medium- and long-term debt securities of the Federal Republic of Germany and the Swiss Confederation**

In derogation of Number 3.1.1, the interval for Futures Contracts on short-, medium- and long-term debt securities of the Federal Republic of Germany and the Swiss Confederation results from the daily high and daily low of the respective Futures contract. In cases where the synthetic daily high is greater than the daily high, the synthetic daily high is used. In cases where the synthetic daily low is less than the daily low, the synthetic daily low is used. When calculating the interval, the following premiums and reductions (absolute) shall be added or respectively deducted:

CONF Futures	+/- 0.25
Euro Bobl Futures	+/- 0.05
Euro Bund Futures	+/- 0.08
Euro Buxl® Futures	+/- 0.30
Euro Schatz Futures	+/- 0.02

### **3.1.3 Entry interval for Index Total Return Futures Contracts**

In derogation of Number 3.1.1, the interval for Index Total Return Futures Contracts results from the daily settlement TRF spread for the respective Futures Contracts from the previous trading day, which is expressed in basis points, pursuant to Chapter II Part 2 Number 2.23.2. of the Clearing Conditions of Eurex Clearing. When calculating the interval, the following premiums and reductions (absolute) shall be added or respectively deducted:

<b>Product</b>	<b>ProduktID</b>	<b>Amount</b>
Index Total Return Futures Contracts on the EURO STOXX 50®	<b>TESX</b>	+/- 25 basis points (1 basis point = 0.0001)

#### **3.1.4 Special Features of the Entry Interval for Daily Futures Contracts on KOSPI 200 Options Contracts of the Korea Exchange (KRX)**

For Eurex KOSPI Daily Futures Contracts, the official closing price of the first contract month of the KOSPI 200 Futures of KRX, which is available for trading on the electronic trading platform “Globex” of the Chicago Mercantile Exchange (“CME”), shall be extended or reduced by twice the margin parameter valid for the Eurex KOSPI Daily Futures Contracts when entering a Block Trade in the Eurex KOSPI Daily Futures Contracts on the Eurex Exchanges. The above-mentioned official closing price is provided by KRX. On the basis of the determined interval and taking into account the implied volatilities of the respective Eurex KOSPI Daily Futures Contracts determined on the Eurex Exchanges, theoretical maximum and minimum values for the price of the respective Block Trade in Eurex KOSPI Daily Futures Contracts shall be determined in the course of the day. The resulting interval shall be extended by half the admissible maximum quote spread on all trading days except the exchange day before the last trading day of KOSPI 200 Options Contracts of KRX. On the exchange day before the last trading day of KOSPI 200 Options Contracts of KRX, the interval shall be extended by the entire admissible maximum quote spread. This results in the interval of the permissible prices for Block Trades in Eurex KOSPI Daily Futures Contracts.

Number 3.1.9 applies *mutatis mutandis* for the determination of the interval for entering a trading strategy in Eurex KOSPI Daily Futures Contracts.

#### **3.1.5 Special Features of the Entry Interval for Daily Futures Contracts on TAIEX Options**

For Daily Futures Contracts on TAIEX Options, theoretical maximum and minimum values for the option price of a Block Trade are determined during the trading day on the basis of the daily high and daily low values of the Daily Futures Contracts on TAIEX Futures, as recorded up to the time of entry of the Block Trade, and the respective implied volatilities established within the options market of the Eurex Exchanges. The interval thus determined is extended by 50 per cent of the maximum Quote Spread permissible on all trading days except on the day before expiration of the TAIEX Options at TAIFEX. On the trading day before expiration of the TAIEX Options at TAIFEX, the interval will be extended by the entire permissible maximum quote spread, resulting in the range of permissible prices for Block Trades. If any trading strategies in Daily Futures Contracts on TAIEX Options are entered, the sum of the individual daily high and daily low values contained in the trading strategy shall be used for the determination of the strategy daily high and strategy daily low values.

#### **3.1.6 Special Features of the Entry Interval for Index Dividend Futures Contracts**

In derogation of Number 3.1.1, the contract price for Index Dividend Futures Contracts may also lie outside the interval if the following conditions have been satisfied. The Management Boards of the Eurex Exchanges publish the admissible Index Dividend Futures Contracts via circular.

- 1) An Off-Book Trade is only accepted for entry in the Eurex T7 Entry Service if sufficient collateral has previously been deposited with Eurex Clearing AG.
  
- 2) Participants shall be deemed to have fulfilled their obligation to provide evidence, if, upon request of the Eurex Exchanges, they provide a trade confirmation for the Off-Book Index Dividend Option or Index Dividend Swaption trade directly linked to the Dividend Index Futures contract. This confirmation in the form of a transaction ticket (e.g. a snapshot of the front-office or back-office system of the buyer of the Futures Contract) shall contain at least:
  - Options or swaptions due date
  - Options or swaptions premium
  - Options or swaptions strike price
  - Underlying Index Dividend Futures Contract (reference Futures Contract)
  - Number of contracts of the reference futures contract to be delivered
  - Counterparties to the Options transaction or the Swaptions transaction
  - Block Trade Reference Number of the Eurex System

### **3.1.7 Entry Interval for EFP-I Futures Trades at Index Close**

For EFP-I Futures trades at index close, the contract price is determined based on the next-available official closing price for the underlying index, plus basis. The basis must always comprise a fixed number and the transaction pricing must be clear and free of doubt.

### **3.1.8 Entry interval for Options Contracts**

For options contracts, theoretical maximum and minimum values for the option price of a Block Trade are determined during the trading day on the basis of the daily high and daily low values of the respective underlying instrument, as recorded up to the time of entry of the Block Trade, and the respective implied volatilities established within the options market of the Eurex Exchanges. The interval thus determined is extended on all trading days except the expiration days by 50 per cent of the maximum Quote Spread permissible for the respective product. On expiration days, the interval will be extended by the entire permissible maximum quote spread, resulting in the range of permissible option prices for Block Trades. If options strategies and options volatility strategies are entered, the sum of daily high and daily low values contained in the options strategy shall apply to the determination of the strategy daily high and daily low values.

### 3.1.9 Entry interval for combined instruments

For combined instruments, maximum and minimum entry values are derived using the entry intervals for the respective leg instruments.

## 3.2 Subpart: Contracts Admitted for Off-Book Trading

The following Futures and Options Contracts admitted for trading at Eurex Deutschland or Eurex Zürich may be entered using the Eurex T7 Entry Service for the trade types specified below.

### 3.2.1 Block trades

The products listed below are admitted to block trading. Aside from the standard contract on a certain underlying instrument pursuant to Annex A and Annex B, contracts may also be traded according to a different type of execution, settlement and term, provided that this has been permitted by the Management Board in the table below ("Additional Contract Versions"). The terms of the trades may not exceed the maximum terms of a Eurex Future or Eurex Option defined by the Management Boards of the Eurex Exchanges and the exercise of the trades may not exceed the maximum execution of an option defined by the Management Boards of the Eurex Exchanges, multiplied by 2.5.

The number of Futures or Options Contracts traded including their additional contract versions may not be below the defined minimum number of contracts to be traded. In cases where calendar spreads, standard option strategies, non-standard option strategies or option volatility strategies for which the block trade service is admitted are entered for Futures Contracts using the service, the following rule applies *mutatis mutandis*.

The Management Boards of the Eurex Exchanges may stipulate at the product level that block trades below a minimum size to be defined by it ("Non-disclosure Limit") are to be disclosed intra-daily. The products affected by this and the respective currently applicable Non-disclosure Limit will be communicated in the context of Eurex's participant communications on the website [www.eurexchange.com](http://www.eurexchange.com).

### **3.2.2 Exchange for Physicals for Financials ("EFP-F")**

The following Interest Rate Swap Futures Contracts are admitted:

- Futures Contracts on a euro-denominated interest rate swap with a 2-year term ("FSWS Future")

- Futures Contracts on a euro-denominated interest rate swap with a 5-year term ("FSWM Future")
- Futures Contracts on a euro-denominated interest rate swap with a 10-year term ("FSWL Future")
- Futures Contracts on a euro-denominated interest rate swap with a 30-year term ("FSWX Future")
- Futures Contracts on the interest rate for three-month cash deposits in Euro ("FEU3 Future")
- Futures Contracts on the average of all effective interest rates for overnight inter-bank deposits over a period of time determined by the Eurex Exchanges, EONIA ("FEO1 Future")
- Futures Contracts on the EUR Secured Funding futures contract on the average of all interest rates over a period of time determined by the Eurex Exchanges for the STOXX GC Pooling EUR Deferred Funding Rate ("FLIC Future")
- Futures Contracts on a notional debt security of the Federal Republic of Germany with an extra long term ("FGBX Future")
- Futures Contracts on a notional debt security of the Federal Republic of Germany with a long term ("FGBL Future")
- Futures Contracts on a notional debt security of the Federal Republic of Germany with a medium term ("FGBM Future")
- Futures Contracts on a notional debt security of the Federal Republic of Germany with a short term ("FGBS Future")
- Futures Contracts on a notional debt security of the Republic of France with a long term ("FOAT Futures")
- Futures Contracts on a notional debt security of the Republic of France with a medium term ("FOAM Futures")

- Futures Contracts on a notional debt security of the Republic of Italy with a long term ("FBTP Futures")
- Futures Contracts on a notional debt security of the Republic of Italy with a medium term ("FBTM Futures")
- Futures Contracts on a notional debt security of the Republic of Italy with a short term ("FBTS Futures")
- Futures Contracts on a notional debt security of the Kingdom of Spain with a long term ("FBON Futures")
- Futures Contracts on a notional debt security of the Swiss Confederation with a long term ("CONF Future")

### **3.2.3 Exchange for Physicals for Index Futures/FX Futures ("EFP-I")**

The following Contracts are admitted:

- Futures Contracts on the ATX® Index (FATX)
- Futures Contracts on the ATX® five Index (FATF)
- Futures Contracts on the CECE® EUR Index (FCEC)
- Futures Contracts on the DAX® (FDAX)
- Futures Contracts on the DivDAX® (FDIV)
- Futures Contracts on the MDAX® (F2MX)
- Mini Futures Contracts on the DAX® (FDXM)
- Futures Contracts on the TecDAX® (FTDX)
- Futures Contracts on the EURO STOXX 50® ex Financials Index (FEXF)
- Futures Contracts on the EURO STOXX 50® Index (FESX)
- Futures Contracts on the EURO STOXX 50® Index (FESQ)

- Futures Contracts on the EURO STOXX® Index (FXXE)
- Futures Contracts on the EURO STOXX® Large Index (FLCE)
- Futures Contracts on the EURO STOXX® Mid Index (FMCE)
- Futures Contracts on the EURO STOXX® Small Index (FSCE)
- Futures Contracts EURO STOXX® Sector Indices
- Futures Contracts on the EURO STOXX® Select Dividend 30 Index (FEDV)
- Futures Contracts on the iSTOXX® Europe Low Risk Factor Index (FXFR)
- Futures Contracts on the iSTOXX® Europe Momentum Factor Index (FXFM)
- Futures Contracts on the iSTOXX® Europe Quality Factor Index (FXFQ)
- Futures Contracts on the iSTOXX® Europe Size Factor Index (FXFS)
- Futures Contracts on the iSTOXX® Europe Value Factor Index (FXFV)
- Futures Contracts on the iSTOXX® Europe Carry Factor Index (FXFC)
- Futures Contracts on the STOXX® Global Select Dividend 100 Index (FGDV)
- Futures Contracts on the MSCI Indices
- Futures Contracts on the OMXH25-Index (FFOX)
- Futures Contracts on the RDX® EUR Index (FRDE)
- Futures Contracts on the RDX® USD Index (FRDX)
- Futures Contracts on the SENSEX (FSEN)
- Futures Contracts on the SLI - Swiss Leader Index® (FSLI)
- Futures Contracts on the SMI® (FSMI)

- Futures Contracts on the SMIM® (FSMM)
- Futures Contracts on the STOXX® Europe 50 Index (FSTX)
- Futures Contracts on the STOXX® Europe 600 Index (FXXP)
- Futures Contracts on the STOXX® Europe 600 Sector Indices
- Futures Contracts on the STOXX® Europe Large 200 Index (FLCP)
- Futures Contracts on the STOXX® Europe Mid 200 Index (FMCP)
- Futures Contracts on the STOXX® Europe Small 200 Index (FSCP)
- Futures Contracts on the TA-35 Index (FT25)
- Futures Contracts on the VSTOXX® Index
- FX Futures Contracts

An EFP-I trade exists if

- Two participants conclude both the reference trade as well as the Futures trade entered using the Eurex T7 Entry Service.
- Two participants conclude the Futures trade with each other. One participant is an official Exchange Traded Fund (ETF) market maker ("Authorised Participant") and concludes the corresponding reference trade with the ETF issuer. The second participant concludes the corresponding reference trade with one or more third parties (auction).
- The reference trades concluded by the counterparties of a Futures trade must not relate to an identical subject. However, every trade must satisfy the requirements set out under Number 3.3.3.

For trades in which the EFP-I Futures trade is to be concluded at the next available official closing price for the underlying index plus basis ("Trade at Index Close"), only those Futures Contracts set out under Number 3.3.2.1 are admissible. In addition, it is admissible to split an EFPI-I trade at index close between two legs of the same contract to improve pricing granularity provided that it is possible to clearly label the legs as belonging together.

### **3.2.4 Exchange for Swaps ("EFS")**

The following Contracts are admitted:

- Futures Contracts on the ATX® Index (FATX)
- Futures Contracts on the ATX® five Index (FATF)
- Futures Contracts on the CECE® EUR Index (FCEE)

VSTOXX® Options (OVS)	VSTOXX® Futures (FVS)
Optionen on VSTOXX® Futures (OVS2)	VSTOXX® Futures (FVS)

The provisions relating to the minimum number of traded contracts pursuant to Number 3.2.1 apply to Options Contracts.

### 3.2.6 Trade-at-Market transactions

The following Contracts are admitted:

Product	Minimum number of contracts traded
<b>Index Total Return Futures</b>	

**Product**

**Minimum number of  
contracts traded**

Index Total Return Futures Contracts on the  
EURO STOXX 50® (TESX)

100

When entering a trade-at-market transaction, the Exchange Participant participating in the trade must enter a valid underlying instrument for this product.

### **3.3 Subpart: Reference Trades Admissible for Off-Book Trading**

#### **3.3.1 Proof of Reference Trade for Trade Types EFP-F, EFP-I and EFS**

Participants using trade type EFP-F, EFP-I or EFS are required to provide proof to the Eurex Exchanges that the Eurex Futures Contracts admissible for the relevant trade type are based on an underlying reference trade relating to an opposite reference instrument defined in Numbers 3.3.2, 3.3.3 and 3.3.4.

The Participant must take suitable precautions to ensure that the executing party of the opposite reference trade is able to satisfy its obligation to provide evidence.

Participants using the trade type EFP-I for a trade at index close are obligated to provide proof to the Eurex Exchanges that the requirements for a trade at index close have been satisfied in respect to the Futures trade.

Under the trade type EFP-F, EFP-I and EFS participants shall be deemed to have fulfilled their obligation to provide evidence, if, upon request of the Eurex Exchanges, they provide confirmation of the conclusion of such opposite reference trade relating to a reference instrument set out in Numbers 3.3.2, 3.3.3 and 3.3.4. The confirmation (e.g., snapshot from the front- or back-office system) must provide information concerning the connection between the opposite reference trade via the respective reference instrument and the corresponding Eurex Futures trade.

For Futures trades in the context of a trade at index close, the participant satisfies its obligation to provide evidence in relation to the satisfaction of the requirements for a trade at index close, if, upon request, it provides confirmation of the conclusion of a trade at index close transaction underlying the respective Futures trade. The confirmation (e.g., snapshot from the front- or back-office system) must indicate the guaranteed price and the connection with the respective official closing price of the underlying index.

### 3.3.2 Reference trades in the context of an EFP-F trade

The following combinations of reference instruments and Futures Contracts are admissible:

Reference instruments	Eurex contract
Eurex or Non-Eurex Fixed Income Futures or Interest Rate Swap Futures <sup>2)</sup>	Eurex Fixed Income Futures or Eurex Interest Rate Swap Futures
Eurex or Non-Eurex Money Market Futures	Eurex Fixed Income Futures or Eurex Interest Rate Swap Futures
Eurex Repo GC Pooling transactions <sup>3)</sup>	Eurex Money Market Futures
Non-Eurex Money Market Futures	Eurex Money Market Futures
Debt securities <sup>1)</sup>	Eurex Fixed Income Futures or Eurex Interest Rate Swap Futures

<sup>1)</sup> Any and all debt securities which exhibit a price correlation with the exchanged Futures Contract in such a manner that the Futures Contract is a suitable hedging instrument for the trade in the reference instrument may be used as a component of an EFP trade.

The underlying trade in the reference instrument for an EFP-F trade must be denominated in a currency of the OECD member states.

<sup>2)</sup> Non-Eurex Fixed Income or Interest Rate Swap Futures respectively within this meaning are all Fixed Income or Interest Rate Swap Futures respectively traded outside the Eurex

---

---

exchanges whose design does not correspond to the essential specifications of the Fixed Income or Interest Rate Swap Futures respectively traded on the Eurex exchanges.

3) A Eurex GC Pooling Repo Transaction specifies a purchase/sale of the GC Pooling ECB or of the GC Pooling ECB EXTended Basket and its simultaneous re-sale/re-purchase as a future. The notional value of the Repo transaction must be equivalent to the value of Eurex Money Market Futures multiplied by the number of contracts.

---

In case of an EFP-F trade with a cash market reference trade, in addition to the general mandatory entries for an Off-Book trade, the following specific entries must be made: ISIN, notional amount, spot price, settlement and due date, coupon, coupon frequency and hedging method.

In case of an EFP-F trade with a derivative that does not create a position as a reference trade, in addition to the mandatory entries which must be made for an Off-Book trade, the following specific mandatory entries must be made: as the ISIN the name of the future to be reported, as the notional amount the number of non-position-creating Futures Contracts, as the spot price the price of the futures (in case of more than one due date: average price), as the due date the due date of the future (in the case of short-term interest rate futures the due date for the futures contract with the longest term), as the coupon the value "0", as the coupon frequency the value "1" and the hedging method.

Depending on the chosen hedging method, the number of Futures contracts creating a position must be in a defined proportion to the notional value of the debt security or to the number of the Futures contracts to be reported respectively. The relation between the futures and the debt securities is defined according to the chosen Nominal, Duration, or Price Factor hedging method. The relation between futures shall be determined by means of the duration method (or the basis point value method respectively).

### **3.3.3 Reference trades in the context of the EFP-I Trade Service**

Trades in a reference instrument which are a component of an EFP-I trade must satisfy the following requirements:

#### **3.3.3.1 Share Index Futures Contracts**

The following combinations of reference instruments and Futures Contracts are possible:

Reference instruments	Eurex contract
Basket of shares	Eurex Share Index Futures
Share of Exchange-Traded Funds	Eurex Share Index Futures
Index Total Return Futures on the EURO STOXX 50® (TESX)	Futures Contracts on the EURO STOXX 50® Index (FESX)
Futures Contracts on the EURO STOXX 50® Index (Quanto-USD, FESQ)	Futures Contracts on the EURO STOXX 50® Index (FESX)

The number of the traded Futures Contracts must be in a specified ratio to the market value of the shares basket or the Share of Exchange-Traded Funds. The market value of the share basket or the Share of Exchange-Traded Funds, at minimum, has to amount to one third of the transaction value of the minimum transaction volume for a block trading transaction in the respective index future (i.e. index level multiplied by contract value multiplied by minimum Block Trades transaction volume, such product being divided by 3) and must not deviate from the contract value of the futures position by more than 20 per cent at maximum. The requirements in the market value of the share basket or the Share of Exchange-Traded Funds shall not be applicable to a Trade at Index Close.

The share basket or Share of Exchange-Traded Funds has to consist of at least 10 different index components or a number of share titles which represent at least half of the share index underlying the Futures Contract. The market value of the part of the share basket or Share of Exchange-Traded Funds whose values are part of the share index underlying the Futures Contract, must be at least 20 per cent of the market value of the entire cash transaction. All share values in the share basket or Share of Exchange-Traded Funds must be part of the STOXX® Europe TMI Index, the MSCI World Index, the MSCI Emerging Markets Index, the MSCI Frontier Markets Index, the ATX® Index, the CECE® EUR Index, the RDX® USD Index, TA-35 Index or the SENSEX Index.

With regard to futures trades which are part of an EFP-I Trade at Index Close or Index Total Return Futures, the minimum number of contracts to be traded is one tenth of the minimum number of tradable contracts specified with regard to Block Trades in the respective index future pursuant to Number 3.2.1.

The market value of the traded Futures Contracts that form a component of a share index futures trade (quanto) against share index futures must not deviate from each other by more than 20 per cent at maximum.

In the case of an EFP-I trade with a stock index trade as a reference trade, in addition to the general mandatory entries for an off-book trade, the reference number of the basket of shares or share in exchange-traded index funds and as the notional amount the market value of the basket of shares or share in exchange traded index funds must be entered specifically. In the case of an EFP-I trade with an Index Total Return Future on the EURO STOXX 50® or a Future Contract on the EURO STOXX 50® Index (Quanto-USD) in addition to the general mandatory entries for an off-book trade, the reference number (TranNo) of the Index Total Return Futures or the Quanto-Index Futures must be entered specifically.

In the case of a trade in share index Futures Contracts in a trade at index close the following entries must be made:

- as the reference number an ID must be used indicating that this is a futures trade in the context of a trade at index close ("TAIC")
- in the case of trades which belong together in the case of splitting across several position-creating futures trades of the same product in addition the reference number (TranNo) of the first-entered trade at index close trade must be entered
- In the field "Text 3" the basis as part of the guaranteed price

### **3.3.3.2 Volatility Index Futures Contracts**

The following combinations of trades in reference instruments and Futures Contracts are admissible:

Reference instruments	Eurex contract
Share of Exchange-Traded Funds	Eurex Volatility Index Futures

Non-Eurex Volatility Index Futures	Eurex Volatility Index Futures
------------------------------------	--------------------------------

Any and all Shares of Exchange-Traded Funds and Non-Eurex Volatility Index Futures which exhibit a price correlation with the exchanged Futures Contract in such a manner that the Futures Contract is a suitable hedging instrument for the spot trade may be used as a component of an EFP-I trade. The number of the traded Futures Contracts must be in a specified ratio to the market value of the Share of Exchange-Traded Funds. The market value of the Share of Exchange-Traded Funds must not deviate from the contract value of the futures position by more than 20 per cent at maximum.

In the case of an EFP-I trade with an opposite volatility index futures trade as a non-position-creating reference transaction, in addition to the standard entries for an off-book trade, the reference number must be entered, as the notional amount the number of contracts, the trade price and the expiry of the volatility index futures trade.

### 3.3.3.3 FX Futures Contracts

The following combinations of trades in reference instruments and Futures Contracts are admissible:

Reference instruments	Eurex contract
Non-Eurex* Sterling - Swiss Franc Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Sterling - Swiss Franc Futures
Non-Eurex* Sterling - US Dollar Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Sterling - US Dollar Futures
Non-Eurex* Euro - Sterling Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Euro – Sterling Futures

Reference instruments	Eurex contract
Non-Eurex* Euro - Swiss Franc Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Euro - Swiss Franc Futures
Non-Eurex* Euro - US Dollar Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Euro - US Dollar Futures
Non-Eurex* US Dollar - Swiss Franc Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex US Dollar - Swiss Franc Futures
Non-Eurex* Australian Dollar – US Dollar Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Australian Dollar - US Dollar Futures
Non-Eurex* Australian Dollar - Japanese Yen Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Australian Dollar - Japanese Yen Futures
Non-Eurex* Euro - Australian Dollar Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Eurex Euro - Australian Dollar Futures
Non-Eurex* Euro - Japanese Yen Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	Euro - Japanese Yen Futures
Non-Eurex* US Dollar - Japanese Yen Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	US Dollar - Japanese Yen Futures

Reference instruments	Eurex contract
Non-Eurex* New Zealand Dollar - US Dollar Futures, Spot, Non-Deliverable Forwards (NDF), FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions	New Zealand Dollar - US Dollar Futures

\* Non-Eurex FX Futures in this sense are all FX futures transactions traded outside of the Eurex Exchanges.

In the case of an EFP-I trade with an opposite FX futures trade as a non-position-creating reference transaction, in addition to the general mandatory entries for an off-book trade, the reference number and as notional amount the number of traded contracts in the FX futures trade must be entered as specific mandatory entries.

In the case of FX futures contracts versus FX spot, non-Eurex FX futures, FX forwards, NDFs pursuant to Number 3.3.3, the participants must issue the corresponding authorisation pursuant to Number 3.3.1 to authorise for trades that are not concluded on Eurex and which do not generate any position in Eurex Clearing that Eurex Clearing AG may obtain knowledge of the following data for the respective trade:

- Name
- Notional amount and, where appropriate, number of contracts
- Price (exchange rate)
- Trade date
- Start date
- End date

In the case of FX Futures Contracts versus FX swap, cross currency (basis) swap, FX swaptions pursuant to Number 3.3.3, the participant must upon request provide evidence of the following pursuant to Number 3.3.1 for transactions which are not concluded on Eurex and which do not generate any position in Eurex Clearing:

- Name
- Currency pair to which the opposite FX transaction relates
- Notional amount
- Trade date

- Start date
- End date
- FX Spot Rate and FX Forward Rate (only for FX Swaps)

In addition, the following information must be provided in the case of cross currency (basis) swaps:

- Initial exchange of the notional amount: (yes, no)
- Final exchange of the notional amount: (yes, no)
- Coupon party (pay, receive), nature of payment (fixed, floating, with or without spread), object of payment (e.g., LIBOR, EURIBOR), frequency,
- Day count convention, calendar,
- Day count convention (e.g. modified following adjusted)
- Coupon counterparty (pay, receive) nature of payment (fixed, floating, with or without spread), object of payment (e.g., LIBOR, EURIBOR), frequency, Day count convention, calendar, Day count convention (e.g. modified following adjusted)

and in addition, the following information must be provided in the case of FX swaps:

- Expiration date

#### **3.3.3.4 Transactions similar to FX Spot**

Transactions which are similar to FX Spot and which meet the requirements stated below may be part of an EFPI Trade:

The FX transactions must have a sufficient price correlation with the exchanged Futures Contract, such that the Eurex Futures Contract constitutes a suitable hedging instrument for the opposite FX transaction.

The number of contracts of the traded FX Futures Contracts must be at least equal to 1 (one). The currency pair of the opposite FX transaction and of the FX Futures Contracts must consist of the same two currencies. The notional value of the opposite FX transaction shall (after conversion into the same currency - if applicable) be equivalent to the notional value of the FX Futures Contract and shall not deviate from it by more than 20 per cent.

#### **3.3.3.5 FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions Transactions**

FX Swaps, Cross Currency (Basis) Swaps and Currency Swaptions may also serve as an underlying in EFP-I Trades if they satisfy the following conditions: The trade must be concluded pursuant to the terms of an ISDA Master Agreement or any

equivalent master agreement and all payments of the swap must correspond to the currency pair that the FX Futures Contract refers to.

### **3.3.4 Reference trades in the context of an EFS trade**

#### **3.3.4.1 EFS for Fixed Income**

An interest rate swap or swaption may serve as a reference instrument in the context of an EFS for fixed income trade if it was concluded under the terms of an ISDA Master Agreement or any equivalent master agreement.

The number of the traded futures contracts must be in a specified ratio to the notional value of the interest rate swap or swaption. The relation between futures contract and swap or swaption shall be determined by means of the duration method. The number of the traded futures contracts must be in a specified ratio to the market value of the shares basket which is reflected by the equity index swap. This ratio may not deviate from the contract value of the futures position by any more than 20 percent.

In case of an EFS trade with an interest rate swap reference trade, in addition to the general mandatory entries for an Off-Book trade, the following specific entries must be made: Notional amount, interest rate, interest payment frequency and start and end date for the swap transaction. In case of an EFS trade with an interest rate swaption reference trade, in addition to the general mandatory entries for an Off-Book trade, the following specific entries must be made: Notional amount, option premium, due date of the option and total term of the underlying swap transaction.

#### **3.3.4.2 EFS for Equity Index**

Transactions in a reference instrument within an EFS for equity index trade must satisfy the following requirements:

The share basket reflected via the swap shall be composed of at least ten different index components or a number of stock certificates which represent at least half of the stock index underlying the futures contract. The market value of the part of the share basket reflected via the swap whose values are part of the stock index underlying the futures contract shall be at minimum 20 per cent of the market value of the entire cash transaction. All single shares in the share basket reflected via the swap shall be part of the STOXX® Europe TMI Index, the MSCI World Index, the MSCI Emerging Markets Index, the MSCI Frontier Markets Index, the ATX® Index, the CECE® EUR Index, the RDX® USD Index, the TA-35 Index or the SENSEX Index. All payments of the swap shall be denominated in a currency of the OECD Member States.

In case of an EFS trade with an equity index trade as a reference trade, in addition to the general mandatory entries for an Off-Book trade, the following specific entries must be made: Notional amount, rate of return, frequency of rate of return payments, settlement date and start and end date of the equity index swap transaction.

The number of the traded futures contracts must be in a specified ratio to the market value of the shares basket which is reflected by the equity index swap. This ratio may not deviate from the contract value of the futures position by any more than 20 percent.
