

# Deutsche Börse Group's T7 - Cash Markets

## What's New!

### Release 11.1

Version 11.1.1

Date 27. Mar 2023

# 1 New Features

## 1.1 Alert Position Configurable

The user may now customize the display location for popup-alerts by defining one of the positions *DownRight* (Default), *Center* or *TopLeft*. The setting can be changed in the GUI application preferences.

## 1.2 TES Auto Approval Rule - Format Simplified

For the *User* attribute the *Owned by* component has been removed to ease adding and maintaining of the rules, i.e. `ABCXETRD001 | XETRA` becomes `ABCXETRD001`.

Import files in old format are still supported but for new files the *OwnedBy* part can be omitted.

## 1.3 Pre-trade Risk Limits: New ActivationDate when Adding New Limits

If new limits are added, the new field *ActivationDate* indicates on which date the limits gets activated, i.e. enabling intraday is not possible. If the *ActivationDate* is empty, the corresponding limit is enabled. Previously setup limits are not affected in any way and simply remain active.
